Dated the 2nd day of ~~Feby~~ March 1920.

Sir,

Enclosed herewith we have the honour to forward on behalf of John Wells an application under the Inventions and Designs Regulation 1894, for leave to file a specification in respect of an invention for Improvements in Gas Producers

The documents sent comprise :- a Power of Attorney in our favour, and the Application with a description of the invention and Drawings.

A Patent for this invention in British India has been applied for, particulars of which are set out in the Application.

The fee of Rs 10/- payable on the application and one rupee for the stamp duty on the Power of Attorney, are included in the Money Order for Rs 77/- being sent by same mail.

We have the honour to be,

Sir,

Your most obedient servants,

H V Williams & Co.

A P P L I C A T I O N

To.

The Dewan of Mysore,

THE APPLICATION of JOHN WELLS of 36 Sharia Falaki, in the City of Cairo, Egypt, Consulting Engineer, for leave to file a Specification under Part 1 of the Inventions and Designs Regulation, 1894.

The applicant is in possession of an invention for "Improvements in Gas Producers" he is the inventor thereof; and to the best of his information and belief, the invention is new within the meaning of Part 1 of the Inventions and Designs Regulation, 1894; and no circumstance exists which, if the applicant be authorized to file a Specification and files it in accordance with that Part will disentitle him to an Exclusive Privilege thereunder in respect of the invention.

An application for a Patent was filed in British India on 4th November 1919, No.4976. See Gazette of India, Part II, Page 1908, dated 15th November 1919, and was accepted on 1st December 1919. See Gazette of India, Part II, Page 2075, dated 6th December 1919.

The following is a description of the invention:-

4

One of the fundamental difficulties or troubles arising in the utilisation of waste vegetable matter as fuel in gas producers is that of feeding material of such bulky nature to the producer at short intervals.

In my improved method hereinafter described, the labour attendant on the feeding of the producer is reduced by the filling of a special hopper at long intervals as compared with that necessary in feeding a producer for vegetable matter by means of the ordinary forms of hopper.

In the accompanying drawing, which shows a vertical section of a producer constructed according to this invention, A is a producer body built of plates of cast or wrought iron, and fitted with an inclined step grate B with an ash discharge into a water seal C, so arranged that from a poke hole D or from a fire door E there is a clear way for pushing clinker from the front or face of the grate B downwards into the ash pit C.

The walls of the producer body A are extended upwardly to provide a hopper G and in the head of the producer body A is a cone or bell H attached to a plate F which covers in the body of the producer A and

effectively separates it from the hopper G. The bell or cone H enters the body A for a convenient distance and forms a gas chamber I above the fuel J. The hopper G is closed by a cover plate K, on which are mounted a feed door L and a spherical socket M movably supporting a ball M' through which passes a feed rod N.

To prevent the escape of gas through the ball, the hole through which the rod N passes is packed with suitable packing to form a gas-tight joint. The feed rod N is suitably weighted and its top end is fitted with a swivel O attached to a chain P, which passes over pulleys QQ and carries a balance weight R. The chain carrying the balance weight may be attached to a mechanical arrangement operated by an engine shaft or other means through adjustable ratchet or like gear in such a manner as to give a periodic movement to the feed rod N mechanically, thus reducing manual labour.

The said gear may be adjustable to impart any desired number of movements to the rod in a given time. At the lower end of the feed rod N a series of teeth or projections S is attached, arranged to form a helix.

To put the producer into operation a layer of fuel

is placed on the grate and then lighted, after which the producer is gradually filled up to the bell H. Thereafter the hopper G is filled to its limit, and the producer is now ready for the production of gas. As the mass of fuel sinks within the producer, an attendant, by actuating the feed rod N, is enabled to force the fuel in the hopper G to pass through the bell H into the combustion space. It may be noted that the rod N on being lifted engages the fuel in the hopper by means of the teeth S and as the rod sinks these teeth force the fuel down with it.

In the event of a hang-up in the hopper, which sometimes occurs with some classes of fuel, the attendant, by means of the rod N, is able to stir up and loosen the fuel in the hopper G and may exert a pressure by pounding - that is to say, lifting the rod N up and down, or by means of tiller rods T may turn the rod N, thus utilising the helically arranged teeth S to force the fuel downwards.

Having now particularly described and ascertained the nature of my said invention, and in what manner the same is to be performed, I declare that what I claim is:-

1. A gas producer having its outer walls prolonged upwardly to form a fuel supply hopper, wherein the said hopper is provided with a fuel discharge cone or bell and a rod movable from outside the hopper, extending through the said cone or bell.

2. A constructional form of the gas producer claimed in claim 1, wherein the cone or bell is arranged to provide a gas chamber in the upper part of the combustion space.

3. A constructional form of the gas producer claimed in claim 1, wherein the said movable rod which may be weighted and balanced and have teeth projecting therefrom passes out of the hopper through a packed hole in a ball mounted in a spherical socket so as to have a universal movement therein.

4. A constructional form of the gas producer claimed in claim 1, wherein the said movable rod is provided with teeth helically arranged thereon and is provided with tiller rods whereby it can be rotated.

5. A constructional form of the gas producer

claimed in claim 1, wherein the said movable rod is operated by an engine shaft or the like through ratchet or like gear adjustable to impart any convenient number of movements to the rod in a given time.

6. A gas producer with an inclined grate and having a poke hole formed in the wall of the producer so that access may be had to the inner surface of the grate to permit clinkers to be pushed off the grate into the ash pit, and a fire door to permit access to be had likewise to the outer surface of the said grate.

4 12

The applicant therefore applies for leave to file a Specification of the invention pursuant to Part I of the Mysore Inventions and Designs Regulation, 1894.

Dated this 20th day of November 1919.

John Wells

I, JOHN WELLS, the applicant above named do declare that what is stated in this application is true to my knowledge, except as to matters stated on information and belief, and as to those matters I believe them to be true.

GENERAL DEPARTMENT.

Register No. 26 of 1919-20

Bangalore, the 6/4/1920

WHEREAS an application, dated the 2nd March 1920 and received on the 5th March 1920, has been submitted under Section 5 of the Mysore Inventions and Designs Regulation, 1894, by Messrs. H. V. Williams & Co., Calcutta, on behalf of Mr. John Wells of 36 Sharia Falaki, Cairo, Egypt, by occupation Consulting Engineer, (hereinafter referred to as "the applicant") for leave to file a specification of an invention for "Improvements in gas producers" (Case IV)

And whereas the applicant has duly complied with all the requirements of Section 5 of the said Regulation;

The Government of Mysore are pleased, under Section 6 of the said Regulation, to authorize the applicant to file a specification of the said invention in accordance with the provisions of the said Regulation.

ORDERED, that the applicant be, and he is hereby, informed accordingly.

By Order of the Government of Mysore,

26.3.20

30.3.20

dcs 27/3/20.

for Chief Secretary to the Govt. of Mysore,
~~*General Department.*~~

July 25/3/20

Certified that the fees prescribed in the fourth schedule to the Mysore Inventions and Designs Regulation, 1894, in respect of the application for leave to file the said specification and of the filing thereof have been paid by the applicant, and that the specification hereinbefore described has been duly filed in accordance with the provisions of Section 8 of the said Regulation on this the Twelfth day of July 1920.

dcs

For Chief Secretary to the Govt. of Mysore,
General Department.

(Section 8 of the Inventions and Designs Regulation, 1894.)

8. (1) If within six months from the date of an order under Section 6, Sub-Section 1), or within such further time, not exceeding three months, as the Government of Mysore, in its discretion, may, on cause shown to its satisfaction and on payment of the fee prescribed in that behalf in the fourth schedule, see fit to allow, the applicant causes a specification of his invention to be filed in manner by this Part required, and the fee prescribed in the fourth schedule in respect of the filing of the specification to be paid, the applicant shall, subject to the other provisions of this Part, be entitled to the exclusive privilege of making, selling and using the invention in the Territories of Mysore, and of authorizing others so to do, for a term of fourteen years from the date of the filing of the specification.

(2) But an exclusive privilege in respect of an invention of a new manufacture shall, notwithstanding anything in Sub-Section (1), cease, if the inventor fails to pay, within the time limited in that behalf by the fourth schedule, any fee prescribed in that schedule in respect of the continuance of the privilege.

(3) If, nevertheless, in any case, by accident, mistake, or inadvertence, an inventor fails to pay any such fee within the time so limited, he may apply to the Government of Mysore for an enlargement of the time for making the payment.

(4) Thereupon the Government of Mysore may enlarge the time accordingly, on payment of the fee prescribed in that behalf in the fourth schedule, and subject to the following conditions, namely :—

(*a*) the time for making a payment shall not in any case be enlarged for more than three months ; and

(*b*) if any suit is instituted in respect of an infringement of the exclusive privilege committed after a failure to make a payment within the time limited for the making thereof and before the enlargement of that time, the Court disposing of the suit may, if it thinks fit, refuse to award or give any damages in respect of the infringement.
